

COLD STABILIZATION

VinFoil Mixer™

The world's most efficient mixer for cold stabilization

Faster and More Efficient Cold Stabilization

Vinfoil mixers achieve cold stabilization three times faster than the traditional methods, thus increasing tank turnover rate, and decreasing energy consumption. These benefits combine for the ultimate in tank efficiency. No shear and low oxygen pick-up.

- Eliminates tank temperature striation
- Improves heat transfer
- Optimizes tank temperature control
- Faster time to achieve cold stabilization
- Drastically decreases energy consumption

Call us at **(707) 577-7826** to find out more about using the Vinfoil Mixer for Oak Extraction.
